01 // CORE_FOCUS

21-year-old English Literature student studying the mechanics of attention: why people stop scrolling, why they keep watching, and how AI can act as the infrastructure to make creating and distributing content repeatable without losing the creator's authentic voice.

02 // BUILT_SYSTEMS_AND_PROJECTS

WhatsApp AI Automation (28 Degree Salon)

PRODUCTION SHIPPED

Node.js · WhatsApp Cloud API · Webhooks · Conversational Logic

Delhi, India · 2026

- Architected and shipped an autonomous WhatsApp booking and inquiry system for a multi-branch salon chain in one night (~14h turnaround).
- Engineered deterministic state-machine flows eliminating booking hallucinations and pricing errors with <2s response latency.

Content Intelligence & Obsidian Second Brain

ACTIVE PIPELINE

Python · Whisper AI · Obsidian API · Knowledge Graphs

2025 – Present

- Built structured CLI ingestion pipeline converting 500+ analyzed short-form Reels into transcribed, parsed knowledge nodes inside Obsidian.
- Created Creator Skill Files extracting sentence cadence length, vocabulary fingerprints, and retention vector triggers.

Programmable Video Pipeline

EXPERIMENTAL

Claude Code CLI · Remotion · React · FFmpeg

2026

- Developed terminal-driven video editing workflows converting transcripts into animated kinetic split-captions (Daniel Dalen style) at 60 FPS.
- Automated word timestamp syncing and headless video rendering directly via code, eliminating manual timeline dragging.

Voice Enhancement Audio Pipeline

CLI TOOL

Python · FFmpeg · Spectral Subtraction · Audio Processing

2026

- Built 1-command audio cleanup utility executing ambient noise subtraction and vocal formant presence EQ boost (1.5kHz–4kHz).

Vibritt Web Agency

FOUNDER

Next.js · TypeScript · Motion Design · Typography

2025 – Present

- Founded boutique digital agency crafting high-engagement web experiences focused on micro-animations and typography.
